

Caso D'uso: una persona sta cercando un personaggio (Wittenger, Jungert) per fare una sponsorizzazione e pubblicizzare il suo prodotto.

- Specify the dataset (characteristics and context)
- Specify the general idea (Analytics part, Visual Part)
- Specify the intended user
- Specify the used analytics
- Specify the various characteristics in relation to the Visual Analytics cycle
- A mockup of the user interface (draft)

DOCUMENTAZIONE DA
PROBIRE PER LA
PROPOSTA

- **Mandatory:** every assignment **MUST** use a dimensionality reduction technique (e.g., PCA, MDS, or a t-SNE) and integrate it in the analysis flow
- **Mandatory: VISUALIZATION:** every assignment **MUST** have a visual part constituted by at least 2 visualizations coordinated in both ways and interactive
- **ANALYTICS:** every assignment **MUST** contain at least 1 computation that is triggered by user visual interactions (no change in the dataset, no simple filter, no simple selection from a menu)

COS'E DA
FARE

- Missing or wrong 1 page draft of the idea (the project is not evaluated)
- Missing dimensionality reduction (the project is not evaluated)
- Missing two coordinated visualizations (5 points penalty)
- Missing related work (5 points penalty)
- Dimensionality reduction NOT integrated in the analysis flow (2 points penalty)
- Not standard color encodings (2 points penalty)
- Missing legends (2 points penalty)
- Scrollable views not justified by design constraints (2 points penalty)
- Too strong reuse of existing solutions (2 points penalty)
- Missing insights (2 points penalty)
- Missing intended system user (2 points penalty)
